Basic
information

Rental process

Contacts

Basic information

When renting items please follow rental process on the next slide.

Please note that some articles are time demanding for production therefore contact well in advance is recommended.

All prices are orientational and could have been updated. Please follow the official offer.

[Back to
Content](#)

Rental process

1. Sent **official order** (incl. article numbers and date of your event) to your partner at ACO PRI customer service
2. We will check availability and contact you with the **delivery details**
3. After your event, please, **check the condition** of rented item
4. Send items back together with **delivery note** (incl. article numbers)

If you have specific request or need another help contact gobrtel@aco.cz

ACO Surface Water Management

GRP (Glass Reinforced Plastic)

Features

Light weight
Cost-effective transportation
and easy manipulation
on site without need
for heavy machinery

Fatigue resistant
Highly resistant to static
and dynamic fatigue
through its lifetime

High creep resistance
Resistance to deformation
from local pressures ensures
shape consistency
and durability

**Stable material
characteristics**
Resistance to external
conditions (weather, UV
radiation and) without change
in mechanical characteristics

Non-porous material
No need of surface coating,
non-corrosive

Easy customization
GRP material properties allow
for tailored customer solution
regarding shape, surface,
and chemical composition

...“LIGHT AS PLASTIC, STRONG AS CONCRETE”
